GoM Data Product (GDP)

Need Gulf of Mexico Exploration & Production data?

Do the current data provisions you subscribe to seem overpriced?

Want a comprehensive data structure & modern delivery?

Ongoing Challenges

- Legacy vendor data is expensive and hard to use
- Custom internal data compilations are usually incomplete
    - Less analysis value
- Most companies gather and load this data far less often when data loading errors / problems are encountered
    - Data not as fresh
- Staff time alone exceeds setld GoM Data Product subscription cost
    - Time is better spent working on your core business

Our Solution

SETLD GDP is an annual data subscription designed to provide a normalized, value-added set of U.S. Gulf of Mexico land / lease, well, production, facilities, pipeline, environmental and cultural data – updated daily.

We deliver this data any way you like it, including: SFTP SHP, FGDB, REST Services, ArcGIS Online, Power BI, ASCII DATs for G&G Apps, etc. SETLD GDP is better information in modern interfaces!
